Assignment: HTML II

Lists

Open the file index.html in the folder " chocolate" in your editor. Insert an ordered list and save the file. The browser's output should be as shown in the following image:

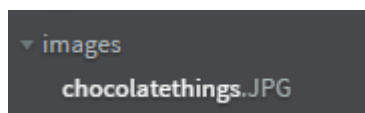

Media - Links

Insert image with alternative text. You will find the image " chocolatethings.jpg" in the folder "images".

Link the image to the page "Wikipedia chocolate". The url of this page is "https://en.wikipedia.org/wiki/Chocolate". We want to open this link in a new window.

The browser's output should be as shown in the following image:

Navigation bar Part I

We will use lists and links to create Navigation bar for the Chocolate site

1. Create two new files in the folder "Chocolate" in your editor.
   a. The first one is the "contactus.html" file with title "Contact us".
   b. The second is the "about.html" file with title "About Choco".
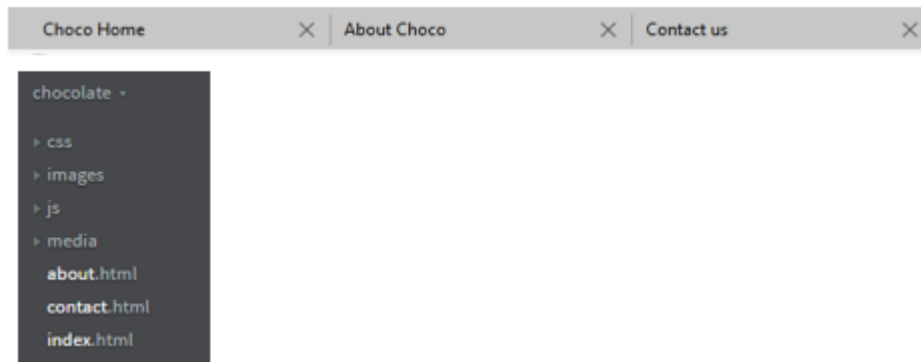

2. In each of these pages, right after the <body> tag, create an unordered list as in the image:

- Choco Home
- About Choco
- Contact us

3. Each item in the list must have a link to the corresponding page. We want to open these links in the same window.

- Choco Home
- About Choco
- Contact us

To submit your work, zip the folder "chocolate" with the name "chocolate.zip"
